Dear Sirs,

I am an Industrial Engineer and Computer Science Analyst, born in November 1975 in Bern, expert in Quality Processes of the automotive industry, and Software Design for a Smart Factory.

I had several work experiences abroad, including Germany, Switzerland, France and China where I contributed to the start of production processes in order to respect applying of IATF 16949.

Driven by a strong passion for technology and innovation, and a knowledge based on automotive products, data managing with power business intelligence, hardware and software knowledge of automatic systems and quality systems, I feel as active part in a project of professional growth.

With strong communication ability to motivate, inspire, and empower the people around me, I have good skills in interacting in complex and dynamic realities and a strong interest in working in a group and creative environment. Good attitude to problem solving and good interpersonal and organizational skills, ample availability and flexibility even for traveling.

Thanking you in advances for your attention, I appreciate your time and consideration.

Please contact me for further information or reference contact details.

Best Regards

Ing. Giovanni Sette
